

MOBILE LASER QUEST TEAM SET UP GUIDE

Use these sheets to build your teams for your live laser gaming session. Fill in your player names to build up the teams to be used in the rotation of play. This is best done before the gaming starts so that we can spend more time playing and less time setting things up on the day.

Combine this with our TEAM ROTATION GUIDE to make your session super easy to control.

- * Each team has a maximum of 6 players
- * The Colours shown on the tables represent the coloured wrist bands we can use to track the team members so teams stay as they are intended. Please let me know if you want to use the wrist bands.

TEAM 1	RED
